EXPERIENCE

Product Management Intern, Icebrkr AI

02/2026 – 05/2026

- Gained hands-on experience in Agile product management, including requirements analysis, product documentation, and user story development across multiple product modules.
- Collaborated with cross-functional teams and stakeholders to support product planning, requirement refinement, and efficient execution throughout the product development lifecycle.

EDUCATION

B.Tech Computer Science and Engineering (AI & ML),

SRM Institute of Science and Technology, Chennai

CGPA: 9.41

2024 – 2028

Chennai

SKILLS

Programming Languages: Java,c,c++,python • **Databases:** MySQL, Firebase Firestore • **Tools:** Git, GitHub, VS Code,, JDBC, React Query • **Frontend:** React.js , javaFx ,Tailwind CSS,Vite •

Backend: Node.js, Express.js, REST APIs

PROJECTS

Student Career Guidance System

- Developed an AI-powered Student Career Guidance System using Java, JavaFX, MySQL, and Google Gemini API, featuring an LLM-powered career chatbot, analytics dashboard, resume builder, and secure student profile management.
- Implemented secure authentication, skill assessment, and AI-driven career guidance, enabling students to interact with the chatbot, generate resumes, and manage their career profiles through an intuitive dashboard.

ZENITH – Interactive Space Situational Awareness Platform

- Built a real-time 3D platform using React, TypeScript, CesiumJS, and live TLE data to track satellites, orbital objects, and visible constellations while providing location-based telescope observation guidance.
- Developed interactive modules for live orbital tracking, orbital debris visualization, and Kessler Syndrome simulation through a cinematic 3D Earth interface

AI Candidate Intelligence Platform

- Built a full-stack analysis tool that cross-references a candidate's resume against their real GitHub activity to flag unverified skill claims. The system extracts skills from an uploaded resume PDF using LLM-based parsing, pulls live repository data via the GitHub REST API, and computes an evidence-backed confidence score comparing claimed vs. demonstrated technical skills. Presents results through an interactive Streamlit dashboard with language-distribution visualizations and auto-generated, gap-targeted interview questions — deployed live on Streamlit Community Cloud.

ACHIEVEMENTS

- **Salesforce Certified Agentforce Specialist.**
- **Multiple Hackathon** – Webathon(finalist), Awesome Hacks, CAD 3.0, Guidewire DevTrails, and ASTRAL WEB INNOVATE'26(finalist).
